ABOUT US

H.M.R. Textiles is your reliable partner in the manufacturing of high-quality Canvas, Tents, Twill, Home Textiles, and Garments. Founded in 1999 and headquartered in Lahore, we have been a pioneer in the textile industry for over two decades. Our dedication to excellence and innovation has established our reputation as a leading textiles manufacturer.

H.M.R. Textiles is a registered exporter to the European Union (REX No. PKREXPk13021940).

Our facilities include:

- Sectional Warping
- Weaving
- Folding and Rolling
- Cutting
- Stitching
- Packing

Number Ducks

#1 (N0.1) COTTON DUCK

100% Cotton Canvas.

Weight: 900 GSM / 26.54 oz per yd²

Extremely Durable. Ideal for high-stress, long-lasting applications where maximum strength is required.

Suitable for heavy-duty tarpaulins, machinery covers, tool bags, and durable gear.

#4 (N0.4) COTTON DUCK

100% Cotton Canvas.

Weight: 810 GSM / 23.89 oz per yd²

Highly resistant to tearing and heavy-duty wear.

Suitable for heavy-duty tarpaulins, lorry/truck covers, industrial warehouse storage, agricultural coverings, and specialized equipment covers

#6 (N0.6) COTTON DUCK

100% Cotton Canvas.

Weight: 695 GSM / 20.50 oz per yd²

High abrasion resistance and tear strength for long-lasting use.

Suitable for heavy-duty tents, shelters, and pop-up canopies. Other uses include durable bags, aprons, and industrial-grade curtains.

Number Ducks

#8 (N0.8) COTTON DUCK

100% Cotton Canvas.

Weight: 600 GSM / 17.70 oz per yd²

Highly durable material designed for maximum resistance to tearing, abrasion, and weather.

Suitable for camping tents, groundsheets, and shelters. Used in manufacturing robust bags, backpacks, and clothing requiring high durability.

#10 (N0.10) COTTON DUCK

100% Cotton Canvas.

Weight: 500 GSM / 14.75 oz per yd²

Heavy duty, durable fabric for rugged and high-wear applications.

Suitable for outdoor gear, including tents, awnings, and equipment covers, as well as heavy-duty totes, workwear, and professional art canvases

#12 (N0.12) COTTON DUCK

100% Cotton Canvas.

Weight: 395 GSM / 11.65 oz per yd²

Resistant to tearing, stretching, and environmental wear. High structural strength.

Suitable for premium, large-format art prints, gallery wraps, and archival photography. It is also ideal for tents, sturdy bags/totes, upholstery, and industrial covers.

Military Grade Fabrics

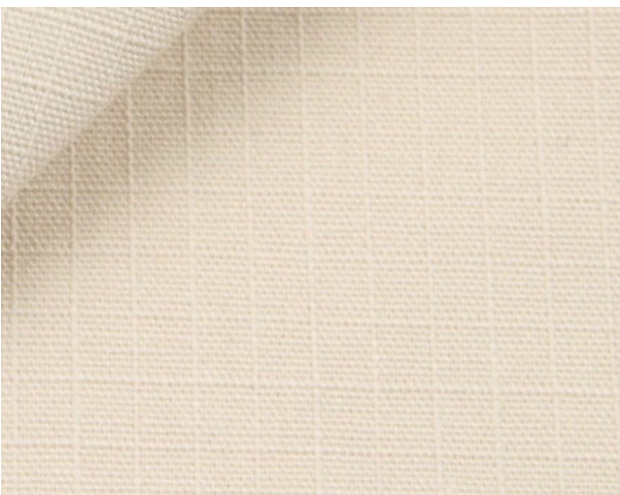

100% NYLON FABRIC

Made of 100% Nylon Yarn, ranging from 300 Denier to 1200 Denier, in duck weave. Used in parachute industry gear, backpack construction, army tent shelters, and heavy-duty bags.

100% POLYESTER CANVAS

Made of 100% Spun Polyester Yarn, ranging from 250 GSM to 800 GSM in plain weave. It features superior tear resistance, waterproofing, UV resistance, and rot resistance compared to cotton. Commonly used for military tents, truck covers, and shelters.

RIPSTOP FABRIC

Made of Polyester/ Cotton / Nylon Yarn. Ranging from 250 GSM - 600 GSM. Cornerstone material in military-grade tactical gear and clothing designed for extreme durability, abrasion resistance, and tear containment.

Twills and Denim

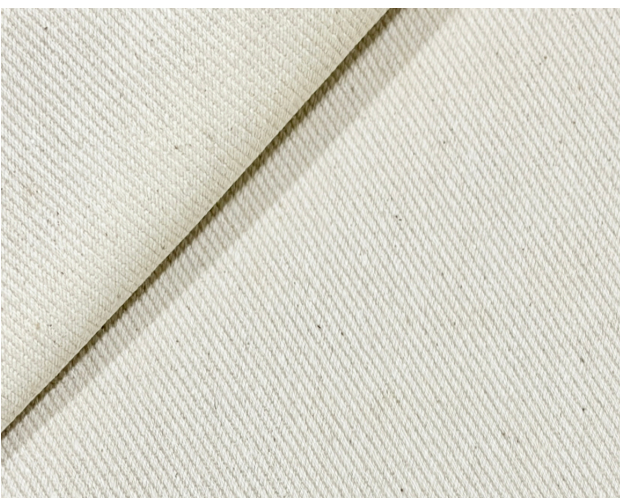

DYED 2/1 TWILL – PC/65:35

Made using 65% Polyester and 35% Cotton blend yarn, in 2/1 Twill weave, and high quality dyeing. This medium-to-heavyweight 250 GSM poly-cotton blended fabric widely used for, primarily, workwear, uniforms, and industrial applications due to its high resistance to abrasion, tearing, and frequent washing.

BULL DENIM

Made using various blends of yarn (Cotton/ Polyester/ Lycra) in 3/1 or 2/1 Twill weave, in 350+ GSM. Due to its durability, bull denim is favored for workwear clothing, including jeans with reinforced knees and pockets designed for demanding, physical labor.

HEAVY TWILL

Made using various blends of yarn in 2/1, 3/1, or 4/1 Twill weave, ranging from 250 GSM to 600 GSM. Its high resistance to abrasion and tearing makes it ideal for work pants, overalls, coveralls, and heavy-duty uniforms, and various other industrial uses.

YARN DYED COLLECTION (GINGHAM)

Our Yarn Dyed collection features an array of Gingham designs (including 2-color, 3-color, and 4-color designs) crafted from either Polyester or Cotton Yarn. These fabrics are mostly woven in a 2/2 Twill weave. Thanks to the dyed yarn, the colors and designs remain vibrant, with no risk of color bleeding even at temperatures exceeding 100 degrees Celsius. This fabric is used in Home Textiles, such as Napkins, Table Linen, Aprons, Totes, etc.

YARN DYED COLLECTION (PICNIC GINGHAM)

Our Yarn Dyed collection further includes various colours of Picnic Gingham made of either Polyester or Cotton Yarn. These fabrics are mostly woven in a duck weave. The dyed yarn ensures the colors and designs remain vibrant, with no risk of color bleeding even at temperatures exceeding 100 degrees Celsius. This fabric is used in Home Textiles, such as Napkins, Table Linen, etc.

Yarn Dyed Collection

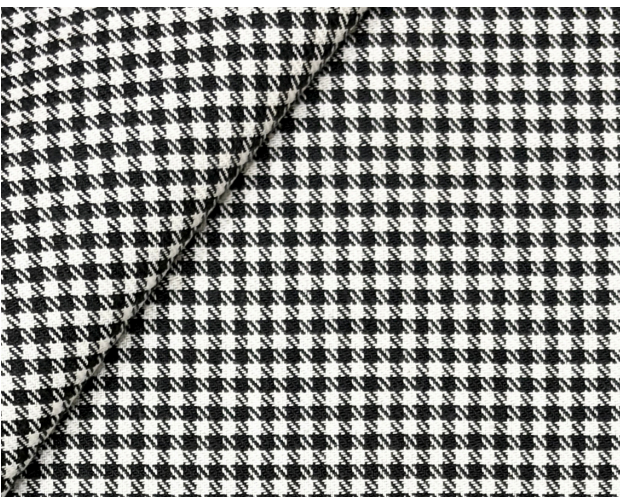

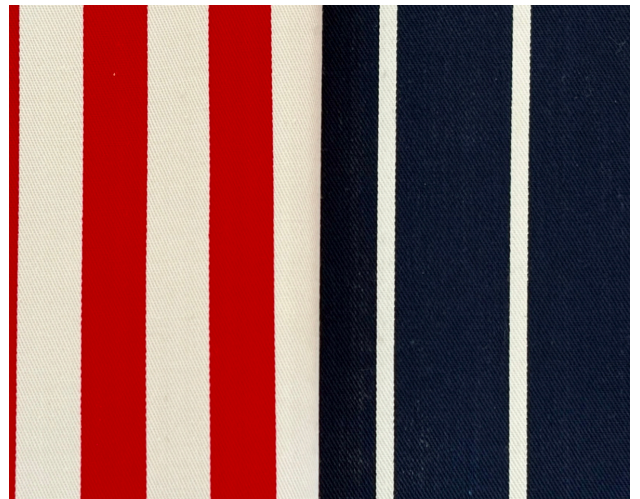

FLANNEL FABRIC

A soft, brushed fabric (cotton, synthetic) favored for warmth, insulation, and comfort in cold-weather clothing and bedding. Common uses include flannel shirts, pajamas, loungewear, blankets, sheets, children's clothing, and accessories like scarves, utilizing its moisture-wicking properties and soft texture.

BUTCHER STRIPE FABRIC

Versatile, durable, and typically medium to heavyweight, Yarn Dyed fabric, crafted from cotton, polycotton, or synthetic fibers, often in a twill weave. While it has traditional ties to butchers' aprons, this fabric is now widely utilized in clothing, workwear, and home décor.

HOUNDSTOOTH (PEPITA)

A timeless, two-toned textile pattern. This design features broken, jagged checks that evoke the shape of a canine's tooth. It is usually woven in a 2/2 twill structure, utilizing alternating light and dark yarns. Made from cotton, polycotton, or synthetic fibers, this fabric is commonly used for chef trousers.
